

E-LEARNING TOOLS FOR CAPACITY BUILDING AND WATER EDUCATION

Linking capacity, sharing, and international cooperation. The event will offer participants the opportunity to learn more about various e-tools through our selected panelists, who will introduce and share e-learning tools used in the water sector. Additionally, we will have an interactive workshop to challenge participants into thinking about the use of e-learning tools in their water-work context and how to contribute in the creation of e-learning material.

March 20th, 13:00 – 15:00 hrs.

**Venue: Room 41
Ulysses Guimarães
Convention Center**
